

**INDUSTRIAL TESTING  
SERVICES**

**THE WORLD... OUR PASSION  
SINCE 1955**

**TECHNICAL BROCHURE**

INTRODUCTION

Ongoing public concern regarding health and safety will continue to make Testing Services more and more relevant. The Testing Services offer key feature to provide for industry analysis and measures. In addition to Fagioli's experience in heavy haulage and lifting business, we offer also a wide range of testing services to industries all across the world.

Larger industry firms often provide various unrelated services. Fagioli's Engineering Department, however, preferred to specialize in particular services or markets due to the high cost of testing equipment and the distinctive characteristics and knowledge required for various testing services.

According to Fagioli's quality and safety certifications **ISO 9001 and ISO 45001**, our company is able to test industrial machines, machinery spare parts and standards or tailor-made equipment for heavy haulage activities in house, under the constant control of our skilled engineers and staff. Thanks to Fagioli's certifications and qualified Engineering Department, our company is able to greet any needs.

Fagioli is able to offer testing services more specialized and specially shaped on your requirements than any laboratory. The keys strength of our services are:

- the **experienced Engineering Department** which plans every tests and allows us to offer a wide range of support and assistant analysis before and after the mechanical tryout
- the **extremely customized tests** which take form on your machines / equipment once got your necessities and concerns
- the **dedicated testing equipment** and areas within our plants assigned to industrial services purposes

Fagioli's industrial testing services avoid unforeseen difficulties, deficiencies and shortcomings of the equipment before it is put to the test on the yards so that problems may be brought to light and promptly solved. Testing Services prevent waste of time, improve the reliability of the equipment and increase safety and quality standards on the sites.

MECHANICAL TEST ON STRAND JACKS

Equipment / machines performance and safety tests provided:

**Industrial Testing**

From small components to large assemblies, we have the technical expertise to provide quality test services in accordance with today's specific industry requirements.

**Automotive Testing**

Our diverse testing capabilities within the automotive industry include dynamics testing, structural testing and extreme environmental aging tests. We can verify your equipment performance under the most demanding conditions.

**Mechanical Testing**

A full service test needs to have the ability to support your testing needs. This includes preparation as well as the testing of your material / components. Our mechanical testing capabilities include tensile, bending, flattening, load testing, cone stripping, fatigue, drop weight and hardness testing.

**Transportation Testing**

The Transportation Industry requires extreme test capabilities such as dynamics testing, structural testing, and environmental conditioning. Our capabilities are designed to perform this testing and keep the country moving.
